

Subtraction Activity 6

Maximum Expected Time Completion: 15 minutes

Instructions: Read the story and solve.

1. **Some frogs sit on a log.**

There are 6 frogs. 

3 jump into the pond. 

How many frogs are still on the log?

$$\begin{array}{cccccc} \text{frog} & \text{frog} & \text{frog} & \text{frog} & \text{frog} & \text{frog} \end{array} - \begin{array}{ccc} \text{frog} & \text{frog} & \text{frog} \end{array} = \underline{\hspace{2cm}}$$

2. **A boy has 7 balloons.**

4 fly away in the wind.

How many balloons are left?

$$\begin{array}{cccccc} \text{balloon} & \text{balloon} & \text{balloon} & \text{balloon} & \text{balloon} & \text{balloon} & \text{balloon} \end{array} - \begin{array}{cccc} \text{balloon} & \text{balloon} & \text{balloon} & \text{balloon} \end{array} = \underline{\hspace{2cm}}$$

3. Phantom the Cat sees 5 birds on a branch.

2 fly away.

How many birds stay on the branch?

$$\text{5 birds} - \text{2 birds} = \underline{\hspace{2cm}}$$

4. There are 8 apples in a basket.

Mommy ate 3 of the apples.

How many are left in the basket?

$$\text{8 apples} - \text{3 apples} = \underline{\hspace{2cm}}$$

5. 10 crayons are on the table.

John gives 6 to her classmates.

How many crayons are still on the table?

$$\text{10 crayons} - \text{6 crayons} = \underline{\hspace{2cm}}$$
